

Relais Polarity Reverse Module

item no.8443

Double switch relay with connecting lead for ENGEL 4-Channel Electronic Switch Module MINI (no. 8431) increasing the MINI switch's switching capacity to 10 A. The relays are wired to provide forward / stop / reverse switching when switch module, motor and battery (main battery +/-, receiver battery +) are connected to it.

Suitable for switching high-current auxiliary working systems such as pumps, electric motors etc.

This module cannot be operated directly from a receiver but requires a 4-Channel Electronic Switch Module MINI (no. 8431).

Technical Specifications:

Operating Voltage 4.8 - 6 V (receiver battery power)

Switching Voltage 6 - 24 V

Max. load 10 A

Switching function 1

Dimensions 43 x 27 x 20 mm

Weight 25 g
